WORKPLACE FIRST AID KIT

Workplace First Aid Kits are in accordance to the CSA standard Z1220-17

Workplace First Aid Kit Classification	1 Employee or Work In Isolation	2-25 Workers Per Shift	26-50 Workers Per Shift	51-100 Workers Per Shift
Type 1: Personal	1	N/A	N/A	N/A
Type 2: Basic	N/A	1 x Small	2 x Small; OR 1 x Medium	4 x Small; OR 2 x Medium; OR 2 x Small & 1 Medium; OR 1 x Large
Type 3: Intermediate	N/A	1 x Small	2 x Small; OR 1 x Medium	4 x Small; OR 2 x Medium; OR 2 x Small & 1 Medium; OR 1 x Large

Type 1: Personal First Aid Kit

An organization shall provide a *Type 1: Personal First Aid Kit* to all workers who work in isolation or those who do not otherwise have access to a workplace first aid kit.

Type 2: Basic First Aid Kit: Small, Medium, and Large

A Type 2: Basic Workplace First Aid Kit is suitable for most workplaces with a low risk work environment. The Basic First Aid Kit contains the minimum content requirements for each of the three sizes of Type 2: Small, Medium, Large and is based on the numbers of workers at the workplace per shift.

Type 3: Intermediate First Aid Kits: Small, Medium, and Large

Intermediate First Aid Kits is suitable for workplaces with higher risk work environments. A Type 3 Kit contains all of the items in a Type 2 Kit in accordance to CSA Standard Z1220-17 requirements plus additional items to meet the needs of workplaces with an increased risk of first aid events in a higher risk environment.

To ensure that Workplace First Aid Kits are readily accessible to all workers and that the particular configurations of workplaces can be accommodated, workplace first aid kits of different sizes (small, medium, and large) may be used in various combinations in accordance with the table listed above. For workplaces with more than 100 workers, First Aid Kits should be proportionally distributed in the workplace.

Note: Workplace First Aid legislation differs from jurisdiction to jurisdiction in Canada. It is the user's responsibility to determine how applicable legislative requirements relate to this standard.

WORKPLACE FIRST AID KIT

01.

To determine the appropriate classification, size, and number of first aid kits for the workplace, the organization should assess the level of risk present in the work environment. This can be done through a workplace risk assessment. The results of this assessment will help the organization determine the level of risk and the appropriate first aid provisions to have on hand.

Note: Additional workplace first aid kits might be required, depending on the outcome of a workplace first aid risk assessment. For guidance on conducting a workplace first aid risk assessment, refer to CSA Standard Z1220-17.

02.

The layout of the workplace (e.g., multi-level workplaces, high-rises); The distance from emergency medical services and/or the response time for emergency medical services

Note: Response times for emergency medical services vary from jurisdiction to jurisdiction. In addition, response time can be impacted by the type of workplace being served. (e.g., a high-rise building).

03.

Workplaces with a smaller number of employees dispersed over a wide area could have differing first aid requirements in different areas; and that workers in remote or isolated areas could require additional first aid equipment and supplies.

Armour's assortment of workplace first aid kits covers the minimum requirements for the quantity and size (small, medium, or large) of first aid kits necessary for different workplace environments based on the number of workers at the workplace per shift. The quantities of the items provided in kits are minimum requirements in accordance with CSA standards. An organization may augment the minimum requirements for first aid kits in the workplace to account for any specific workplace hazards or risk or to address other site-specific conditions.

ACCESSIBILITY

First Aid Kits and equipment should be located at or near the workplace that they are intended to serve; and readily accessible during working hours. Every organization should ensure that each worker is aware of the location of the workplace first aid kit(s) and any associated equipment or supplies.

The minimum requirements for the contents of a workplace first aid kit, its classification (Type 1, 2, or 3) and size (small, medium, or large), and the number of kits required in any particular workplace should be determined by the number of workers at the workplace per shift in accordance to the table provided.

An organization should undertake a workplace first aid risk assessment to determine the classification of first aid kit required for its work environment and to identify any additional supplies necessary to address particular site-specific conditions.

WORKPLACE FIRST AID KIT

TYPE 1: PERSONAL KITS

WORKPLACE FIRST AID KITS ARE IN ACCORDANCE TO THE CSA STANDARD Z1220-17

First aid regulations vary by province and other factors such as type of industry, potential for hazard, proximity to a medical facility and the number of workers per shift.

ATTENTION

In accordance to CSA standard Z1220-17 required contents for a Type 3 Intermediate First Aid Kit require a malleable splint with foam padding and an arterial tourniquet.

This is not to be confused with a wire splint and latex-free tourniquet.

These products **DO NOT** meet the compliance standards.

ARTERIAL TOURNIQUET

MALLEABLE PADDED SPLINT

WORKPLACE FIRST AID KIT

REQUIREMENTS GUIDE

WORKPLACE FIRST AID KITS ARE IN ACCORDANCE TO THE CSA STANDARD Z1220-17

Workplace First Aid Kit Classification	1 Employee or Work in Isolation	2-25 Workers Per Shift	26-50 Workers Per Shift	51-100 Workers Per Shift
Type 1 Personal	1	N/A	N/A	N/A
Type 2 Basic	N/A	1 Small	2 Small; or 1 Medium	4 Small; or 2 Medium; or 2 Small & 1 Medium; or 1 Large
Type 3 Intermediate	N/A	1 Small	2 Small; or 1 Medium	4 Small; or 2 Medium; or 2 Small & 1 Medium; or 1 Large

TYPE 1

Suitable for workers who work in isolation or those who do not otherwise have access to a workplace first aid kit.

TYPE 2

Suitable for most workplaces identified as a low risk work environment. All kit sizes of this type contain the minimum content requirements and is based on the number of workers at the workplace per shift

TYPE 3

Suitable for most workplaces identified as a high risk work environment. These kits contain all contents from Type 2 kits plus additional items to meet the needs of a high risk workplace.
